85 / 100 Speed

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://stroysovetnik.ru/wp-content/plugins/wp-spamfree/js/wpsfv2-js.php>

[Optimize CSS Delivery](#) of the following:

- <http://stroysovetnik.ru/wp-content/cache/wpfc-minified/9913plx6/abgd6.css>
- <http://stroysovetnik.ru/wp-content/cache/wpfc-minified/g3sren0u/abgd6.css>

Mobile

- <http://stroysovetnik.ru/wp-content/cache/wpfc-minified/320raohi/abgd6.css>

Consider Fixing:

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 364B (12% reduction).

- Minifying <http://stroysovetnik.ru/> could save 364B (12% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 130B (20% reduction).

- Compressing <http://stroysovetnik.ru/wp-content/themes/stroysovetnik/img/widget-title.jpg> could save 130B (20% reduction).

70 / 100 User Experience

 Should Fix:

Configure the viewport

Mobile

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Очистив поверх...истым и сухим. and 7 others render only 6 pixels tall (16 CSS pixels) final.
- Читать дальше and 1 others render only 6 pixels tall (16 CSS pixels) final.
- Тротуарная плитка ФЭМ and 1 others render only 6 pixels tall (16 CSS pixels) final.
- Тротуарная плитка ФЭМ and 3 others render only 6 pixels tall (16 CSS pixels) final.
- Создание сайта...я "Оптимист" - and 3 others render only 5 pixels tall (14 CSS pixels) final.
- Строительство...Строй Советник and 1 others render only 5 pixels tall (14 CSS pixels) final.

Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 1,008 CSS pixels wide, but the viewport is only 980 CSS pixels wide. The

Mobile

following elements fall outside the viewport:

- The element `<h1>Строительство и ремонт</h1>` falls outside the viewport.
- The element `<h2>Как стелить ламинат</h2>` falls outside the viewport.
- The element `<p>Одним из самых...е советы ниже...</p>` falls outside the viewport.
- The element `<p>Для того, чтоб...будут всегда.</p>` falls outside the viewport.
- The element `<p>Очистив поверх...истым и сухим.</p>` falls outside the viewport.
- The element `<p>Итак, как стел...аминат самому?</p>` falls outside the viewport.
- The element `<p>Читать дальше...стелить ламинат</p>` falls outside the viewport.
- The element `<h2>Тротуарная плитка ФЭМ</h2>` falls outside the viewport.
- The element `<p>На смену тради...ечной службой.</p>` falls outside the viewport.
- The element `<p>В чем же основ...овое покрытие?</p>` falls outside the viewport.
- The element `<p>Читать дальше...ная плитка ФЭМ</p>` falls outside the viewport.
- The element `<div class="navigation"></div>` falls outside the viewport.
- The element `<p>` falls outside the viewport.
- The element `создание сайто...оительных фирм` falls outside the viewport.
- The element `<div id="menuh"></div>` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `Материалы` and 3 others are close to other tap targets final.
